2016 JCEG VIII Meeting

Overview

Dr. Bazina presents his Master's research regarding 3D superimposition. Registration topic removed from future Agendas. 3D Printing, intraoral scanning.

Purpose: To map the transition from 2D cephalometrics to 3D cone beam imaging for assessment of orthodontic outcomes as well as diagnosis and treatment planning. To facilitate the transition from plaster models to 3D digital study casts.

Please see child pages for individual meeting notes/minutes, and make any modification to the text you deem necessary.
