

2009 JCEG II Meeting

• [Eventbrite](#)

JCEG II- The Next Step

The second meeting of JCEG will be held at the Bolton Brush Growth Study Center, Case Western Reserve University, in Cleveland, Ohio from November 13 to November 15, 2009. All members of the orthodontic community interested in CBCT imaging are invited to attend. The meeting will be organized around the six working groups each headed by a team of JCEG members. Three meeting hours will be scheduled for each of the six topics over a three day period for a total of 18 hours. Each topic would begin with an introduction of the topic by the working group leaders. This introduction will be followed by a preliminary group discussion to identify important areas to be covered by this working group. Following the introduction and preliminary group discussion we will break into smaller groups of about 15 people each. Each session will conclude with a one hour meeting of the entire group to build consensus.

Following the protocols established in JCEG I, the group sessions will be videotaped and transcribed. A summary of the proceedings will be sent to the AJO-DO for publication in the Technobytes section.
